

INTRODUCING NikonSeemax

The ultimate single vision lens
custom-made to frame shape

Nikon Seemax is a revolutionary double-aspheric single vision lens entirely custom-made to the wearer's frame shape and prescription.

Seemax technology generates individual designs for each frame shape and prescription via multi-directional analysis along 9 aspheric axes.

THE RESULT:

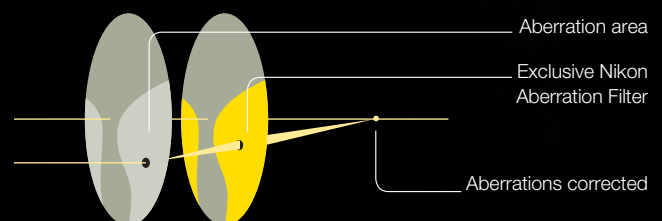

- SHARP, VIRTUALLY DISTORTION-FREE VISION, WHATEVER THE ANGLE OF GAZE
- OPTIMAL LATERAL AND PERIPHERAL VISION
- LARGE DEPTH OF FIELD

INTRODUCING NikonSeewide

The premier double-aspheric
progressive lens with Nikon Aberration Filter[®]

Derived from Nikon advanced camera technology, Nikon Seewide uses an exclusive back surface Aberration Filter which compensates for front progressive surface aberrations.

THE RESULT:

- WIDE ANGLE VISION
- INSTANT FOCUSING
- FAST ADAPTATION
